

Ryan Madhuwala

AI Infrastructure Engineer | AI/ML & Distributed Systems | Open Source Maintainer

rawx18.dev@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#) | [X](#)

EXPERIENCE

- **Caracal, Founder (Feb 2026–Present):** Open-source authorization infrastructure for AI agents – policy-approved actions, revocable delegation, tamper-evident audit. Benchmarked p50 17ms / p95 23ms end-to-end governed request latency; sustained 133 req/s (~11.5M calls/day) with zero errors across an 87,000-request suite.
- **LF Decentralized Trust, Lab Leader (Sep 2025–Present):** Linux Foundation lab leader (age 20) driving decentralized-infrastructure, security, agent-trust, multi-agent AI, and large-scale retrieval projects; lead maintainers across multiple labs; speaker at several Open Source Summits; [LFX Mentor '26](#) for Caracal.
- **GitMesh, Creator (Jul 2025–Mar 2026):** Built a developer-intelligence platform correlating market signals with engineering telemetry to auto-generate ranked backlogs; scaled to 14 services behind 312 API endpoints and 92 PostgreSQL tables. Adopted by CNCF projects (Jaeger, Cartography, Krkn), the Linux Kernel community, and Intel Open Source; now under Linux Foundation Decentralized Trust.
- **Linux Foundation, AI Engineer Intern, LFX '25 (Jun–Nov 2025):** Built multi-agent architecture, vector retrieval, and context-memory systems at Hyperledger Labs, powering agentic workflows adopted by Hyperledger Fabric, Besu, and other flagship blockchain projects.
- **DRDO (Defense Ministry of India), AI Research Intern (May–Jul 2025):** Designed a novel Entanglement-Assisted Quantum Genetic Algorithm (EAQGA) for mining-operations optimization; derived the closed-form optimum and validated the optimizer against it, converging to a 0.00% gap in 1.8s by generation 14.
- **DeepLearning.AI, GANs Mentor (Jun–Sep 2025):** Mentored global learners through the GAN Specialization, providing guidance and debugging support.
- **AIPlato inc., NLP Intern (May–July 2024):** Built NLP systems and an AI RAG system using AI frameworks, AI vector databases, and data science.

RECOGNITION & PROGRAMS

- **GitHub Secure Open Source Fund '26:** One of open source's most prestigious programs; selected among the top maintainers globally alongside OpenClaw, FastAPI, LangChain, and

ONNX.

- **Vercel OSS Program:** [Spring '26 cohort](#); top 30 open-source projects globally, selected for Caracal.
- **Mintlify OSS Program:** Selected for Caracal.
- **Microsoft for Startups:** Backing Caracal with Azure and Microsoft Foundry credits and ecosystem access.
- **Founders, Inc. (Canopy):** Accepted (<4% acceptance rate).

SKILLS

- **Languages:** Go, Python, TypeScript, SQL, Bash
- **AI Systems:** Agentic Systems, LLM Infrastructure, RAG, Multi-Agent Systems, AI Security, Agent Authorization
- **Security:** OPA/Rego, OAuth, JWT, STS, Delegation, Policy Enforcement, Audit Systems
- **Distributed Systems:** Distributed Authorization, Async Systems, Event-Driven Architecture, REST, gRPC
- **Infrastructure:** Kubernetes, Terraform, Docker, Linux, AWS, Azure, GCP, Cloud Networking
- **Data:** PostgreSQL, Redis, OpenSearch, Qdrant, Neo4j, Temporal, MongoDB, DynamoDB

ACHIEVEMENTS

- **Smart India Hackathon 2024:** Winner
- **Walmart Sparkathon 2025:** Finalist
- **Innovation, Design & Entrepreneurship 2025:** Best Pitch
- **Patent (Applied):** Lead inventor, Multi-Modal AI Surveillance System (App. No. 202521020743)

EDUCATION

- **B.Tech CSE (Dropped Out), IIIT Gwalior:** 7.8 CGPA, 2023–2025
- **JEE Mains, NTA:** 99.1 Percentile, 2023

TALKS & COMMUNITY

- **Speaker:** Open Source Summit KR '25, NA '26; OpenSearchCon KR '25 & CN '26
- **Attended:** Open Source Summit JP '25, IN '26 & OpenSearchCon EU '26
- **GitHub:** Invite-only Maintainer Summit 2026; featured on [Open Source Friday](#)
- **Organizer:** Co-organizer, OpenSearch User Group Ahmedabad
